Nandi News

July 2025

Message from the President of Nandi Charity

loss in July. Sandra has been working hard on working to get our veterinarian costs down. Sandra has put together a “Sterilization Campaign”. From July to September, we will be offering to pay 100% of all sterilizations. This is in line with our mission. Sandra has put a notice about the free sterilizations in the Portuguese newspaper. The newspaper is published by the Lagos Camera and will help to educate the community about the importance of sterilizations.

The new Nandi Charity website is being constructed. There is a lot of new content going into the website, and we want to make sure that everything is working before we publish it.

Lastly, we have posted signs in both stores advertising for volunteers. As you probably know, we are very short on van drivers, as well as clothing and furniture store volunteers. In fact, there were several days in July that we could not open the furniture store due to lack of volunteers. The summer is always a challenge with so many volunteers taking their holiday. Hopefully, the staffing issues will be minimal moving forward.

If anyone has any questions or concerns, please feel free to reach out to me. I am available through WhatsApp. Thank you for your patience and all of your continued support.

Sanctuaries and Charities given assistance by Nandi in July

Sanctuaries/Charities

2500 EUROS

Veterinarian expenses

5166 EUROS

Food donations

1446 EUROS

The walks take place, weather permitting, on the first and third Fridays of the month.

PLEASE HELP PROTECT THE FELINE COMMUNITY

Feline distemper, also known as feline panleukopenia virus (FPV) or feline parvo, is a devastating and sometimes fatal disease that occurs in cats. It has also been called cat fever, cat plague, feline agranulocytosis, and feline infectious enteritis.

FPV is a highly contagious disease spread among cats and found practically everywhere in the environment. Cats are more susceptible to contracting the virus, though, if they are based in communities such as kennels, animal shelters, pet stores, and feral cat communities.

kittens, immunocompromised cats, and unvaccinated cats are at greater risk. They can also be more severely affected.

This disease affects the intestinal lining and white blood cells. While it is life-threatening, cats who survive will become immune to a subsequent infection.

Nandi Charity is 100% volunteer organization. Volunteers are needed to work in furniture store, clothing store and as van drivers for donation retrieval and the delivery of purchased items.
